Template Front

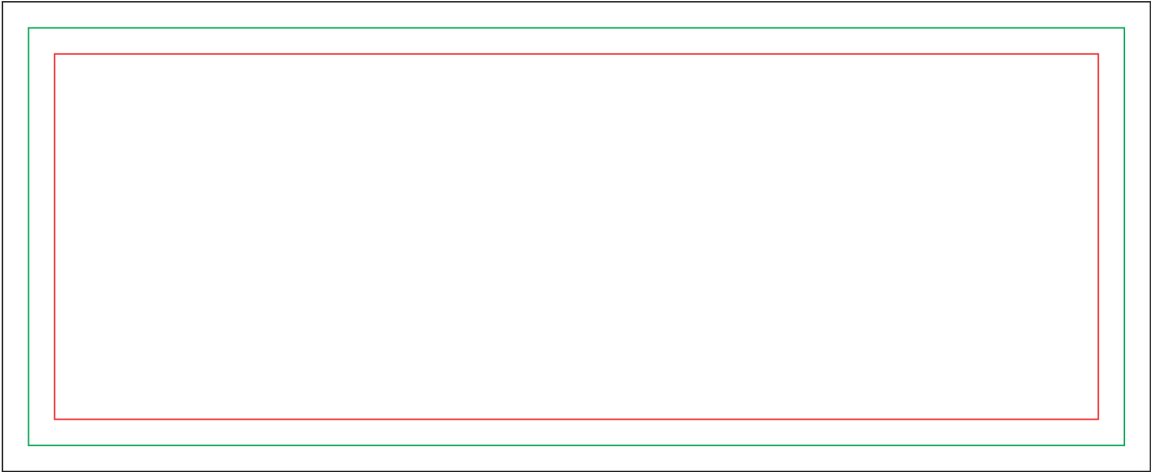

Image Bleed Margin

2.25 in. x 5.5 in. Black (outer) Line -

If you add a background image to your design, and you want the image to extend all the way to the edge of the ticket - - scale your image so that it touches the outer black lines.

Note: this is not the final cut dimensions, but just a safety overflow region to allow for margin of error in the Final cut.

Final Cut Margin

2.0 in. x 5.25 in. Green (middle) Line -

This is the printers cut line.
Anything outside this line risks being cut off from the finished product.
Only images meant to extend off the edge (bleed) of the ticket should extend beyond the green line.

Safety Margin

1.75 in x 5.0 in Red (inner) Line -

All “required” design elements that you place on the template (other than a full bleed background image) should be placed within this margin in order to guarantee that they are visible on the final cut product.
